Income price dates	1st working day
Portfolio valuation time	17:00
Transaction cut off time	15:00
Daily price information	The Local newspaper and www.sanlamunitrusts.co.za
Repurchase period	3 working days

Fund Objective

Capital growth is of primary importance and results in a higher allocation to equities. Investors should be prepared to tolerate capital fluctuations over the shorter term with a recommended investment horizon of 5 years and longer. Capital stability is achieved through the diversification across a variety of assets and a selection of skilful investment managers with complementary strategies. The fund is Regulation 28 compliant and is limited to 60% equities. This portfolio may invest in participatory interests of underlying unit trust portfolios. The portfolio may also invest in collective investment schemes in property as well as any other securities that the Act may allow from time to time. When investing in derivatives, the manager will adhere to prevailing derivative regulations.

Risk Profile (Moderate)

In this portfolio, capital growth is of primary importance and results in a higher allocation to equities. The portfolio may display capital fluctuations over the shorter term, however, volatility levels should be lower than a pure equity fund. While diversified across all the major asset classes, this portfolio is tilted more towards equities and other risky asset classes to ensure the best long-term returns of all the asset classes. Fixed income positions are minimized.

Fees (excl VAT)	Retail-class
Initial fee	0.00%
Advice Annual fee	Neg.*
Annual Management fee*	1.25%
Total Expense Ratio (TER)	1.56%

* Advice fee | Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

* This fund is also available via certain LISPS (Linked Investment Services Providers), who levy their own fees.

Obtain a personalised cost estimate before investing by visiting www.sanlamunitrustsmdd.co.za and using our Effective Annual Cost (EAC) calculator. Alternatively, contact us at 0860 100 266.

PERIOD: 01 April 2021 to 31 March 2024

Total Expense Ratio (TER) | 1.56% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) | 0.14% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 1.70% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

Effective 01 October 2024, SCI will charge a monthly administration fee of R20 excluding VAT on retail investors whose total investment value is less than R50,000.

The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.

Portfolio Manager(s) Quarterly comment

June arrived with surprises from an interest rate cutting perspective. The European Central Bank (ECB) became the second major central bank to cut rates after the Bank of Canada (BoC). The Swiss National Bank (SNB) cut rates for the second consecutive time in June while sentiment over monetary policy easing remains mixed among major economies. The Swiss bank now forecasts economic growth of around 1% in 2024 and around 1.5% in 2025. The US labour market posted job gains in June, despite the unemployment rate increasing slightly. Japan's core consumer price index (CPI) increased ahead of market expectations and the Bank of Japan (BoJ)'s 2% target. Locally, government spending exceeded R2 trillion. More positively for the local economy was that the JSE broke through the 81 000-point mark.

Global equities continued their surge in June, when the MSCI World Index ended the month up 2.03% in dollar terms. Mega-cap tech stocks' influence on global equity market returns remains significant, with the Magnificent 7 making a valuable contribution to the MSCI World's performance in June. Nvidia has since been the standout performer for the index, even amongst the Magnificent 7, delivering a quarter of global equity market returns in June. Emerging markets (EMs) also had a strong month with the MSCI EM Index gaining 4.01% month-on-month (m/m) in dollars. Global bonds and global property were positive, gaining 0.14% m/m and 0.51% m/m in dollars. The FTSE Index was negative for the month, ending at -1.15% in pounds, but the S&P 500 posted gains of 3.59% for the month in dollars. The Dow Jones ended the month up 1.23% in dollars, the EuroStoxx 50 was negative at -1.72% m/m, and the Nikkei was positive at 2.94% m/m.

South African equities were among the best-performing emerging markets in June as the FTSE/JSE All Share Index ended the month at 4.08%. Stocks geared to the domestic economy were the main beneficiaries of improving sentiment. The bond market was positive, with the FTSE/JSE All Bond Index gaining 5.24% m/m. Bonds of 1-3 years gained 1.87% m/m, bonds of 3-7 years gained 4.14% m/m, bonds of 7-12 years gained 5.91% m/m and bonds of above 12 years gained 6.80% m/m. Industrials and Property posted gains of 5.1% m/m and 5.95% m/m respectively. Financials was the outperformer for the month, posting gains of 14.51%, but Resources underperformed, ending the month negatively at -3.56%. The rand finished the month strongly at 3.11% against the US dollar, 4.44% against the euro, 3.85% against the pound and at 0.54% against the Japanese yen.

Additional Information

All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme. The Manager retains full responsibility for the co-named portfolio.

Graviton is responsible for the management of the investments held in the Fund. The management of investments are outsourced to Sanlam Multi Managers International (Pty) Ltd (FSP) Licence No. 845, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

* The highest and lowest 12 month returns are based on a 12 month rolling period over 10 years or since inception where the performance history does not exist for 10 years.

Performance figures are sourced from Morningstar.

Glossary of Terms

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Diversification

This is a strategy designed to reduce risk within a portfolio by combining a variety of investments (or asset classes) such as equities, bonds, cash or property, which are unlikely to all move in the same direction. This is designed to reduce the risk (and protect against capital losses) within a portfolio. Diversification allows for more consistent performance under a wide range of economic conditions as it smoothes out the impact of negative market events. The positive performance of some investments or asset classes should neutralize the negative performance of others.

Multi-managed solution

Multi-managed investing combines a range of investment managers with complementary styles, across different asset classes. The risk of the investors' portfolios is reduced as a result, without impacting on the overall long-term returns.

It is based on the premise that no one manager is likely to perform well in all market conditions and all circumstances.

Passive Balanced Strategy

The Passive Balanced strategy comprises passive asset classes using index funds, with dynamic allocation towards each asset class.

Regulation 28

Regulation 28 of the Pension Funds Act sets out prudent investment limits on certain asset classes in investment funds. It applies specifically to investments in Retirement Annuities and Preservation Funds. The allowed maximum exposures to certain asset classes is:

- 75% for equities
- 25% for property
- 45% for foreign (offshore) assets

Sharpe ratio

The Sharpe ratio measures risk-adjusted performance of an investment or portfolio. It measures the amount of risk associated with the returns generated by the portfolio and indicates whether a portfolio's returns are due to excessive risk or not. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much the returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.

Total Expense Ratio (TER)

This refers to the total costs associated with managing and operating an investment's administration, financial planning and servicing fees. Costs consist of management fees and expenses such as trading, legal and auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.
